

FOR IMMEDIATE RELEASE

Completion of New Production Facility for Semiconductor Manufacturing Equipment in Kasado Area

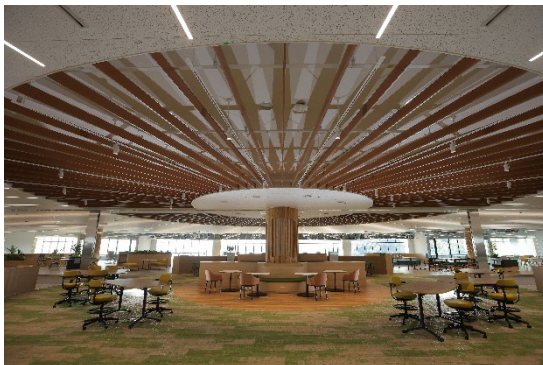

Exterior of new production facility

Tokyo, March 31, 2025 – Hitachi High-Tech Corporation ("Hitachi High-Tech") announced that the new production facility for semiconductor manufacturing equipment (etch systems), which had been under construction since December 2023 in the Kasado area (Kudamatsu City, Yamaguchi Prefecture), was completed and started the operation on March 17, 2025.

We aim to increase production capacity through digitalized and automated production lines in the new production facility. In addition, a comfortable work environment has been created with employee well-being taken into account, while achieving carbon neutrality through the use of renewable energy.

Semiconductor-related markets are expected to continue to grow and expand due to increasing demand for generative AI and autonomous driving in the future. With the start of the new production facility's operation, we will continue to create new value and solve customers' issues by shortening development periods, reducing costs, and improving productivity.

Hitachi High-Tech will continue to pursue and create new value together with our customers in order to contribute to sustainable industrial development that supports cutting-edge manufacturing and digital society, and to the realization of a sustainable society by solving social issues.

Interior of new production facility

Overview of the New Production Facility

Location	757-1 Miyanosuhama, Higashitoyoi, Kudamatsu-shi, Yamaguchi Prefecture
Site area	Approx. 80,000 m ²
Total floor space	Approx. 35,000 m ²
Construction	Steel construction, four-floor building
Total investment	Approx. 24.5 billion yen
